

CV 430 Release Agent

CLASSIFICATION:

- Asphalt release agent

PACKAGING:

Pail	Drum
20L	210L

DESCRIPTION:

- A highly dilutable asphalt release agent that inhibits asphalt from sticking to surfaces. Excellent for polymer based asphalt.

CHEMICAL AND PHYSICAL PROPERTIES:

- | | |
|--------------------|--------------------|
| • Appearance | Clear amber liquid |
| • Odour | Mild |
| • pH | N/A |
| • Specific Gravity | 1.0 |
| • Viscosity | 50-500 cps |

USE DIRECTIONS:

- Use at 1:10 – 1:30 using an aspirator system or from a pump up sprayer. If using a pump up sprayer, shake before using since the product will separate in water.
- Spray diluted product onto surface as required to prevent asphalt from sticking

See Material Safety Data Sheet for proper handling and safety instructions.
